Customer Advisory – Railway Closures Impacting Central Europe Rail Operations

Dear Customer,

We would like to inform you about ongoing railway infrastructure works that may impact rail freight services to/from the Port of Koper (Slovenia) and the Dunajská Streda HUB (Slovakia).

Key Impacts

- Slovenia: The railway line between Koper and Divača will be fully closed from 04 July 2026, 06:00 until 05 July 2026, 18:00 due to maintenance and investment works.
- Slovakia: The section between Nové Košariská and Podunajské Biskupice will be affected by a railway closure from 01 July to 31 August 2026, resulting in train rerouting and reduced network capacity.

Expected Impact

These closures may lead to extended transit times and delays for rail shipments moving through the Port of Koper and the Dunajská Streda terminal. We are adjusting transport plans and working closely with infrastructure providers to minimize service disruptions wherever possible.

Should you have any questions regarding your shipments or require updated transit information, please contact your local Customer Service representative.

Thank you for your understanding and continued cooperation.

Sincerely,
Maersk
